SUBJECT INDEX (Vol. 4, 1981)

Abstracts, 32, 72, 112, 150
Anatomical photography: inside view (Mitchell, Grandage), 120
Art and medicine: enduring partnership (Kay), 3
Assessment technique for teachers and students: microfiche-based exercise in clinical microbiology (Hartwig, Watson), 26
Blood pressure measurements and audiovisual aids: enhancements to teaching about observer variation (Hedley, Pearson), 15
Breast cancer, advanced, standardized serial photography in assessment of treatment of (Gilson, Parbhoo), 5
Cancer, advanced breast, standardized serial photography in assessment of treatment of (Gilson, Parbhoo), 5
Colour off-set lithography, in-house, for medical education (Siwek, Chessell), 40
Colour subtraction method, simple, for angiographic examinations: photographic method (Terwey, Krastel), 45
Computer-based graphic system, development and implementation of (Levine, Michelson, Ritacco, Christ), 134
Contact lenses, wide-angle retinal photography using (Aan de Kerk, Steenbergen), 139
Cost recovery for instructional resources (Klosevych), 49
Cost recovery, total, in a university photographic department (Lund), 23
Editorial, 39, 79, 119
Educational technology service provided by Southampton University for Wessex Health Region, re-assessment of (Hart), 62
Equipment and Methods, 31, 66, 105, 144
Eschar, penetration of, by infrared photography (Stevenson), 141
Examination, final MB (Psychiatry), at St Bartholomew's Hospital Medical College, videotaped case histories in (Jolly), 123

Facial photoradiography: practical considerations (Fanibunda, Hill), 95
Far East, medical illustration in (Ho), 58
Fluorescein angiography of anterior ocular segment using Topcon OA-1 ocular camera (Yamaaki, van der Werf, Aan de Kerk), 55
Gallery, 2, 38, 78, 118
Graphic system, computer-based, development and implementation of (Levine, Michelson, Ritacco, Christ), 134
Infrared photography, penetration of eschar by (Stevenson), 141
Infrared transillumination using photography and television (videodioscopy) (Morton, Miller), 88
Infrared and ultraviolet reflectance measurements as aid to diagnosis of pigmented skin lesions (Marshall), 11
Instructional resources, cost recovery for (Klosevych), 49
Learning materials, 107, 146
Liver disease, clinical photography in (Gilson, Summerfield), 91
Medical illustrator and educational technology (Marks), 130
Medical illustration in Far East (Ho), 58
Medical school, television and video in: facilities, scope and management of small production unit (Marshall, Evans, Judd), 80
Medicine and art: enduring partnership (Kay), 3
Microfiche-based exercise in clinical microbiology: assessment technique for teachers and students (Hartwig, Watson), 26
Obituary, 29
Observer variation, enhancements to teaching about: audiovisual aids and blood pressure measurement (Hedley, Pearson), 15
Ocular segment, anterior, fluorescein angiography of, using Topcon OA-1 ocular camera (Yamaaki, van der Werf, Aan de Kerk), 55
Offset lithography, in-house colour, for medical education (Siwek, Chessell), 40
Photographic department, university, total cost recovery in (Lund), 23
Photography, anatomical: inside view (Mitchell, Grandage), 120
Photography, clinical, in liver disease (Gilson, Summerfield), 91
Photography, infrared, penetration of eschar by (Stevenson), 141
Photography, standardized clinical, in plastic surgery, suggestions for (Jemec, Jemec), 99
Photography, standardized serial, in assessment of treatment of advanced breast cancer (Gilson, Parbhoo), 5
Photography and television (videodioscopy), infrared transillumination using (Morton, Miller), 86
Photography, ultraviolet, in detecting 'latent' halos of pigmented lesions (Marshall), 127
Photography, wide angle retinal, using contact lenses (Aan de Kerk, Steenbergen), 139
Photoradiography, facial: practical considerations (Fanibunda, Hill), 95
Pigmented lesions, 'latent' halos of, ultraviolet photography in detecting (Marshall), 127
Plastic surgery, suggestions for standardized clinical photography in (Jemec, Jemec), 99
Printing and related technologies, development in (Holmes), 20
Reports, 68, 111, 149
Retinal photography, wide angle, using contact lenses (Aan de Kerk, Steenbergen), 139
Reviews, 34, 74, 115, 153
Serial photography, standardized, in assessment of treatment of advanced breast cancer (Gilson, Parbhoo), 5
Skin lesions, pigmented, infrared and ultraviolet reflectance measurements as aid to diagnosis of (Marshall), 11
Speech, time-compressed (Leatherdale), 103
Teachers of general practice, survey of use of televised consultations by (Taylor), 52
Televised consultations, survey of use of, by teachers of general practice (Taylor), 52
Television and video in medical school: facilities, scope and management of small production unit (Marshall, Evans, Judd), 80
Television (videodioscopy) and photography, infrared transillumination using (Morton, Miller), 86
Time-compressed speech (Leatherdale), 103
Transillumination, infrared, using photography and television (videodioscopy) (Morton, Miller), 86
Ultraviolet and infrared reflectance measurements as aid to diagnosis of pigmented skin lesions (Marshall), 11
Ultraviolet photography in detecting 'latent' halos of pigmented lesions (Marshall), 127
Video and television in medical school: facilities scope and management of small production unit (Marshall, Evans, Judd), 80
Videotaped case histories in final MB (Psychiatry) examination at St Bartholomew's Hospital Medical College (Jolly), 123
Viewpoint
Invisible or invaluable (Demarest), 22
Medical illustrator and educational technology (Marks), 130
Writing for audiovisual media (McPheeters), 94
